Legend

[##]	Country Code
#	Automation available from most locations.
(CC)	Country-to-country calling available. (May not be available to and from all international locations.)
+	Limited availability.
*	Wait for second dial tone.
^^	Not available from public pay phones.
~	Pay phones may require coin deposit or a local phone card for dial-tone.@
@	Local service fee in U.S. currency required to complete call.
{	Prepaid cards not permitted via the WP Access by local Carriers.

Special Note

Canada, Puerto Rico, United States Virgin Islands (USVI), Guam, Saipan and Commonwealth of Northern Mariana Islands (CNMI) are considered Domestic Access locations.

Rev. 05/03

NOTES:

Your source for all voice, data, email and web hosting

800-809-0663

HOW TO PLACE A CALL

1. Dial the WorldPhone access number for the country you are in.
2. Dial the card number.
3. Dial the number you wish to reach or wait for the MCI operator to complete the call.

For calls to the U.S. and Canada

Dial 0 + area code and number
Or dial your Private Dial Plan Number

For all other countries

Dial 011 + international number
Or dial your Private Dial Plan Number

Country to country calling

Countries that allow calling within the country and between countries are indicated with (CC). Restrictions may apply to the countries to which calls are placed.

More than one call?

To place another call, DO NOT HANG UP.

- Press **2** for 2 seconds (listen for tone).
- Dial the number you are calling or the **2** feature.

Calling a U.S. toll-free number?

Follow the dialing instructions and enter the toll free number as 0 + 800 or 0 + 888 or 0 + 877.

Need Directory Assistance?

After entering your card number, wait for an operator to come on the line. Ask the MCI operator to look up the domestic or international number for you.

Calling from a hotel?

Ask the hotel operator about hotel-added surcharges and how to dial from your room.

Many hotels do not assess charges when you are using a calling card. Using payphones also eliminates hotel charges.

Need customer service?

Dial the WorldPhone access number and enter your card number. Wait for an operator and request customer service. If you are having problems accessing WorldPhone, contact the local operator and place a collect call to the Customer Service number on the back of this card.

Country not listed?

Visit the MCI web site at www.mci.com and type "WorldPhone" in the "search word" tool to get the most up-to-date list of access numbers. Or, dial the access number, enter your card number, and wait for the operator. Request customer service.

Want to make a PC connection?

Determine what must be dialed to get an outside line from the hotel or business and add that to the beginning of your PC software dial string, then add the access number followed by:
...9#[CardNumber]#PhoneNumber#

Increase the number of commas to compensate for a longer post-dial delay.

For more information on PC connections and instructions on using Microsoft Windows 95 & 98 Dial-Up Networking, visit www.mci.com and enter "Data Access" in the "search word" tool.
